

Congratulations on your purchase of The Perfect Posie®

**Filling instructions are simple yet essential to achieve
the correct consistency for optimum results.**

You will need approximately 40litres of polystyrene foam balls.

For safety reasons your zipper is sent without a handle. Please use the paperclip provided to unzip The Perfect Posie®. Please be mindful of the safety latch inside the zipper handle chamber. If your paperclip is not threaded through correctly the safety latch will not allow the zipper to slide.

We recommend to fill The Perfect Posie® in the bathtub. This will contain the polystyrene foam balls and makes spillage easy to scoup. Ensure your bathtub plug is sealed.

Fill The Perfect Posie® by using the white zipper funnel that is sewn into The Perfect Posie® for your convenience.

Continuously zip up The Perfect Posie® and swirl the polystyrene balls around to move into all the chambers.

You are welcome to use anti-static fabric spray to assist with the static electricity caused by the foam balls.

Enjoy The Perfect Posie® and we look forward to seeing your images come alive!
